

## WARNING

**YOU AND YOUR FAMILY are at RISK.**

## FACTS

LAST MONTH IN BRITISH COLUMBIA, 4\* PEOPLE DIED OF  
A DRUG OVERDOSE **EVERY DAY.**

Almost all of those who died were occasional users of pot,  
cocaine, ecstasy or meth. They were **NOT HARD CORE DRUG  
ADDICTS.** **Most** street drugs are now cut with Fentanyl.  
**FENTANYL** is an opioid like **MORPHINE** but 50 to 100 times  
more toxic. You cannot see, smell or taste Fentanyl.

YOU MAY THINK YOU ARE JUST DOING A BIT OF POT OR  
COCAINE RECREATIONALLY BUT THE REALITY IS IT IS  
PROBABLY LACED WITH FENTANYL  
**TOO MUCH FENTANYL KILLS YOU.**

If **you** are a regular user of **POT** you can become **addicted**

**WHAT CAN YOU DO? Don't use drugs.**

**If you do use drugs, make sure you have someone  
with you who can give you **NALOXONE.** Naloxone  
reverses the effects of opioids. Naloxone take home  
kits are free. (<http://towardtheheart.com/naloxone/>)**

**IF YOU MUST SMOKE ENSURE IT IS FREE OF FENTANYL.**

ROUND LAKE ALCOHOL AND DRUG TREATMENT CENTRE ADVOCATES FOR  
ABSTINENCE BUT THIS WARNING IS ABOUT SAVING LIVES.
